

ASURE ID[®]

Asure ID[®] 2009 Card Personalization Software

ACCESS secure identity.

Asure ID® 2009 Card Personalization Software

So intuitive, fast and efficient, it's hard to believe this is ID card software.

Powerful tools in a friendly package.

Asure ID 2009 changes the paradigm of how ID card personalization software looks, feels and performs. A fresh new user interface and simplified processes make ID card template design and data entry a breeze. Behind the friendly interface, Asure ID 2009 is a productivity powerhouse with tools and capabilities to support the most sophisticated ID card applications. Whether you're new to ID badging or a power user, Asure ID 2009 helps you design and produce ID cards and other secure credentials with unprecedented ease and efficiency.

Productivity has never looked better.

If you've used the latest version of Microsoft® Office, the Asure ID 2009 user interface will seem familiar — because it's based on the Microsoft Ribbon. Tab-driven navigation with convenient tools and fly-out control palettes make using Asure ID 2009 a real pleasure. What could be easier, or more economical, than teaching someone how to use a new application with an interface they already know?

The new Asure ID 2009 user interface offers much more than good looks. It provides a dramatic speed boost to designing cards and entering cardholder data. Everything you need to design and populate

a card is right in front of you, and routine tasks can be performed with a couple of mouse clicks. It's a breeze to capture or load a photo, or add a digitized signature. A Data Entry Center with configurable on-screen data fields lets users set up an efficient data entry sequence independent of how the data appears on a card, or is structured in a database.

Databases demystified.

For many users, the Asure ID 2009 internal database is all they need to store card templates and cardholder information. But with Live Link™, you can also print card data from external databases such as HR, security or ERP. The Live Link Wizard sets up real time data exchanges with a few mouse clicks. At print time, Live Link accesses and delivers the data that populates the external data fields on each card.

Live Link real time data exchange lets you mix cardholder data from internal and external sources on the same card. The Live Link Wizard simplifies setting up connections to external databases.

The Asure ID you've always wanted.

Asure ID 2009 is a complete rethinking of the most effective ways to design and produce personalized IDs. HID Global started with years of knowledge and development experience, added thoroughly researched new tools and best practices for users, and then built Asure ID 2009 on the Microsoft .NET technology platform for stability and interoperability.

If you're accustomed to previous versions of Asure ID, you're going to love Asure ID 2009. Upgrading is simple. Asure ID 2009 has built-in tools to import both your v5 templates and database information into the new Asure ID.

Tools at your fingertips

HID Global software engineers collaborated with usability experts to give Asure ID 2009 a highly productive interface.

- 1 **Tabbed navigation** separates functions such as card design and data entry into always-present clickable tabs.
- 2 **Tool ribbons** put frequently used elements (such as data fields, bar codes and photos) into logical groups within easy reach.
- 3 **Flyout palettes** simplify the workspace by hiding template attributes until they need to be accessed.
- 4 **WYSIWYG display** helps ensure accurate card design by showing exactly how a card will print, including data placeholders.
- 5 **Consistent properties dialog boxes** put object attributes (such as color or position) into a set-then-dismiss floating window.

Data entry streamlined.

In addition to simplified card design and database connectivity, Asure ID 2009 also provides a fast and efficient way to enroll thousands of cardholder records into the database. The configurable Data Entry Center lets you control how data is sequenced and entered, which greatly improves the speed and throughput of enrolling cardholders.

It does simple, it does complex.

Asure ID 2009 comes in four editions with increasing levels of sophistication. So whether you're making simple photo IDs or issuing highly secure smart card credentials, Asure ID 2009 is a great choice.

Asure ID Solo™ 2009 provides an enhanced user experience for photo ID card design and data entry. Card data fields can be populated from the internal Microsoft Access™ database.

Asure ID Express™ 2009 adds features such as compound data fields, batch printing and conditional design and print rules. It can connect to an external Microsoft database.

Asure ID Enterprise™ 2009 offers expanded database connectivity and networking for enterprise-class card issuance. It works with Microsoft Access

and SQL databases and supports ODBC import and export. The Enterprise edition can work with multiple tables within a single database.

Asure ID Exchange™ 2009 is designed for the most sophisticated secure credential applications. It adds Oracle, MySQL, LDAP and DVTel® database support and works with multiple tables within multiple databases. And its iDIRECTOR™ encoding and management module improves smart card deployment and development. iDIRECTOR manages how smart card applications are loaded onto cards — including card memory management — in one encoding pass.

For ID card applications that call for even greater control and integration into your organization, an Asure ID 2009 SDK is also available.

Beyond easy. Beyond simple.

The most surprising advantage of Asure ID 2009 is its intuitive nature. Tools and processes have been so carefully designed that Asure ID 2009 seems to anticipate what you need next. If you want to make ID card personalization more productive, you need software that takes easy and simple to the next level: Asure ID 2009. Ask your HID Global dealer. Or visit: www.hidglobal.com/fargo.

The one program for all printers.

Asure ID 2009 works with card printers from many different manufacturers. Just by switching to Asure ID 2009, you can upgrade to a much easier, efficient and effective ID card production system and extend the investment in your current hardware.

If you are using Fargo® ID Card Printers from HID Global, Asure ID 2009 offers even more features and functionality for your ID card operations, such as tight integration to Fargo OnQueue™ Card Production Software and other enhancements.

Asure ID® 2009 Card Personalization Software

| GENERAL | SOLO | EXPRESS | ENTERPRISE | EXCHANGE |
|--|------------|------------------------|-----------------------|----------------------|

(1) Manage and control card access formats, smart cards and card applications.
 (2) Storage limitations based on MS Access.
 (3) Bidirectional data exchange with third party databases and applications.

ASURE ID®

Asure ID 2009 meets the card application needs of:

- Government agencies and departments
- Large corporations
- Financial institutions
- Small to medium-sized businesses
- Colleges and universities
- Health care facilities and research labs
- Service bureaus

HID Global is your trusted source for secure identity solutions.

Asure ID 2009 is just one part of a complete, integrated system for the issuance, management and authentication of secure IDs. Your HID Global dealer can custom design a secure identity system using proven HID components including:

- Fargo ID Card Printer/Encoders
- Cards, ribbons, films and overlaminates
- ID card production management software
- Digital cameras and photo accessories
- ID card holders, lanyards and clips
- ID card production services
- HID contact and contactless card readers, including iCLASS® smart card readers
